DETAILED ACTION

Election/Restrictions

Applicant's election of Group III, claim 6, in the response filed May 9, 2002, is acknowledged. Upon further consideration, and in light of the amendment of claims 1 and 7-9, the previous restriction requirement, mailed April 8, 2002, has been withdrawn in favor of the restriction requirement set forth below. The Office regrets any inconvenience to the Applicant.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2 and 4-8, drawn to a method for increasing stress resistance to a plant which comprises introducing into a plant a glactinol synthetase gene encoding a protein of SEQ ID NO:1, classified in class 800, subclass 289, for example.
- II. Claims 1, 3-7 and 9, drawn to drawn to a method for increasing stress resistance to a plant which comprises introducing into a plant a glactinol synthetase gene encoding a protein of SEQ ID NO:2, classified in class 800, subclass 284, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Inventions I and II require the use of structurally different glactinol synthetase genes. Where structural identity is required, such as for expression, the different gene sequences have different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, their recognized divergent subject matter, and the requirement for different areas of search, restriction for examination purposes as indicated is proper.

Art Unit: 1638

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
